---

## Development Projects

---

### TicTacToe - Game | Sole Developer | <https://github.com/yeissonnn/ticTacToe-Game>

Developed a simple game engaging two players with an intuitive interface.

- Built with JavaScript, HTML & CSS.

### E-commerce Project | Sole Developer | June 2022 | <https://e-commercer-project.netlify.app/>

- E-commerce page that can be adaptable to any product and company. Great design and excellent user experience. Built with HTML & CSS.

### FitnessTrack app | Team Developer | <https://github.com/yeissonnn/FitnessTrackerBackend>

Full-stack API enabling users to log in, build fitness routines and view other users' activity and track goals

- PostgreSQL, Node.js, Express and PG library and JWT

### JuiceBox Database | Team Developer | <https://intense-fortress-12573.herokuapp.com/>

- Design of back-end database and a web server with a custom API.
- Built database in PostgreSQL. The Web server was developed with Node.js, Express and PG library. User authentication via JSON Web Tokens(JWT).

### Stranger's things | Team Developer | July 2022 | <https://ben-tay-yei-strangers-things.netlify.app/>

Craigslist-style website that allows registered users to create/read posts and send messages by fetching data from an API.

- React.js, JWT.
